**SCOUTDI**

Fully Digitalized
Asset Inspection

The Scout 137 Drone System and the Scout Portal give you safer and quicker inspections at lower cost, with a data chain that allows better decisions, sooner.

A complete end-to-end data solution for non-entry inspection of confined industrial spaces.

→	→	→
Safe, agile and efficient inspection with 3D Lidar technology	Live-streaming of inspection data to off-site stakeholders	Post-survey analysis and data integration via open API

Scout 137
Drone System

A tethered drone system for safe inspection of confined spaces and indoor industrial assets.

- 👁 **Situational awareness**
- 🚁 **Non-entry inspection**
- 🔌 **Unlimited flight-time**
- 📊 **Stable flight, better data**
- 📶 **Inspection live-streaming**

Scout Portal

The Scout Portal is a powerful cloud-based tool for the live-streaming, capture, storage, and analysis of data for your confined space inspection needs.

- 📶 **Inspection live-streaming**
- ✏ **Findings annotation**
- 🖼 **Report Generation**
- ☁ **Cloud data storage**
- 📉 **ML-based data analysis**
- ☁ **Data integration via API**

Fully digitalize your inspection process with our complete inspection system

SCOUTDI

Vertical laser sensor for altitude control

Onboard 32 beam Lidar for safe indoor flight and 3D mapping

Images and video location-tagged in 3D map

High powered illumination with multiple lighting modes

2-axis stabilized gimbal, pitch adjustable +/- 90°

Tether system for unlimited flight time and robust data connection

Crisp 4K pictures and video, full HD live-streaming to cloud
